

ACO DRAIN

**CNE Horsebarn Animal Center,
Toronto, ON**

ACO PORTFOLIO

Product:

KS100S with Type 440 fiberglass grates

The CNE Horsebarn in Toronto has been converted into an animal shelter for stray animals and unwanted pets.

The kennel area where the dogs are housed has a sloped floor to enable quick and easy wash down of spilled food and animal waste. A trench drain was needed to drain away the washwater and waste.

KS100S with fiberglass grates was chosen as the stainless steel rail and fiberglass grate are both corrosion resistant to the waste matter and cleaning fluids used.

The large openings on the 440 grate are not easily blocked and have the hydraulic capacity to drain high volumes of water from a pressure hose, to make kennel cleaning as quick and effective as possible.
