Brickslot with KlassikDrain K100S Channel
PCL Contractors, Kelowna, BC
Stantec Consulting Ltd., Kelowna, BC

Stuart Park is a rehabilitation project undertaken by the City of Kelowna. The city wanted to find a way to make the area, adjacent to Okanagan Lake, a promenade lakeside park. During this renovation, the city decided to use paving stones to enhance the beauty of the area, thus making ACO Brickslot a perfect choice.

Brickslot is a discreet drainage solution for use with brick or stone pavers. The 7/16" slot blends in with the paving joints, giving an aesthetic solution. Additionally, the drain uses a polymer concrete K100S channel which can withstand the extreme weather and temperature fluctuations between the summer and winter months in Kelowna.
