

# ACO DRAIN

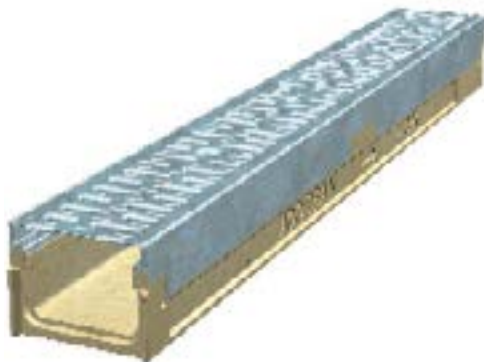

## North Vancouver Library North Vancouver, BC

### ACO PORTFOLIO

**Product:**  
**Engineer:**  
**Specifier:**

***H100 with perforated galvanized steel ADA grates***  
***Terra Designworks Inc., Surrey, BC***  
***Phillips Farevaag Smallenberg, Vancouver, BC***

The landscape architect of the North Vancouver Library was concerned that standing water may collect or pool on this large plaza area and create a public safety hazard.

Being a two-tier outdoor plaza, they wanted rain water to be intercepted and collected before it went near the steps down to the second level.

Because of the restrictions where the trench drain would be installed, ACO's H100 SlabDrain with shallow 4" invert depth was an ideal fit for the situation.

Additionally, the galvanized steel grates are ADA and pedestrian safe.
