

ACO DRAIN

Bishops Landing Halifax, NS

ACO PORTFOLIO

Product:

K100S with Type 411 galvanized steel perforated grates

Bishops Landing is a condominium complex in Halifax, Nova Scotia. The condominiums are located adjacent to a landscaped pedestrian sidewalk.

Concerns over water collecting on the hard paving, and possible seeping into the complex during periods of heavy rain, were addressed by sloping the sidewalk away from the condominiums.

A trench system was installed to capture and remove the excess water from the area.

The pre-sloped ACO Drain K100S with galvanized, perforated grates was installed to deal with the problem. The grate is ADA compliant, pedestrian safe, and locked into position with the unique QuickLok boltless locking system.
