

ACO DRAIN

FedEx Garage Calgary, AB

ACO PORTFOLIO

Product:

S100K Powerdrain with Ductile Iron slotted grates

The maintenance manager at the Federal Express garage in Calgary wanted to install trench drain to provide continuous drainage for water runoff.

ACO's PowerDrain S100K system was chosen for both its hydraulic performance and heavy duty loading capabilities.

Apart from withstanding the loadings of the vehicles, the trench drain had to stand up to the bins and skids used in the sorting and despatch areas.

The continuous run of trench drain is connected to a large central drain sump located in the middle of the building.
