

ACO DRAIN

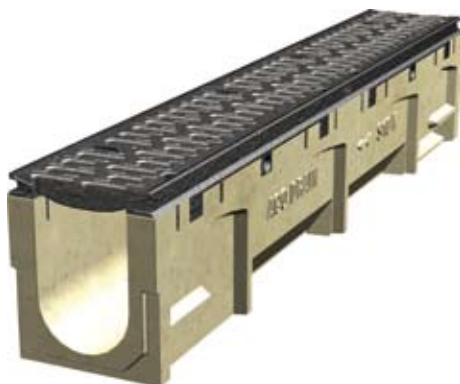

Windsor EMS Station Windsor, ON

ACO PORTFOLIO

Product:

S100K Powerdrain with Ductile Iron slotted grates

Windsor's EMS Vehicles and garage floors are washed down on a constant basis, but draining the water from the Epoxy-coated floor was a problem and trench drain was needed. Further more, the trench drain would need to withstand the daily abuse of large vehicles traveling over it. ACO's PowerDrain S100K trench drain system with slotted ductile iron grates was specified.

The S100K not only fulfilled the hydraulic requirements, but its Load Class F rating allowed heavy duty traffic to safely drive across it. Three runs totaling 115 linear feet were installed in the parking area.
