## Centre d'Excellence Sportive, Sherbrooke University, Sherbrooke, QC

### PROJECT PORTFOLIO

#### **Product:**

#### ***System 2000 slotted system***

The Centre d'Excellence Sportive at Sherbrooke University was the venue for the 2003 IAAF Junior World Championships.

The running track required its own drainage system to ensure drainage of the track to prevent race delays if weather was inclement. Effective drainage is also required to protect and extend the life of the track surface.

ACO Sport System 2000 was used around the track. The smooth, flat surface of the slotted system allows track material to be bonded to the trench to anchor the track surface in place.

System 2000 is available in straight and radiused sections to fit exactly around a 400m track and meets the tolerances required for IAAF tracks.
